Mr. J.C. Chaudhry
Chairman cum Managing Director (CMD)

A lot has changed at Aakash during the transition from a humble coaching institute started in 1988 to becoming a recognized name in the education field. We live by the notion that the very essence of success is a strong value system. We still believe in the age-old Indian concept of “Guru-Shishya” relationship where guru shares his knowledge reserves with his pupils and the ‘Shishya’ strives hard to quench his knowledge thirst.

It has been our endeavour to make Aakash much more than a coaching institute, which is to build it into an institution of reputation and purpose. We consider our students the torchbearers of the future of the country and thus we aim to enlighten the future of the relation through this young generation. We dream of a progressing India through the eyes of our students and assist them in accomplishing their dreams with the collective efforts of our faculty & staff members, our students and their parents.

For 30 years, we have been aiming to nurture students and help them in their endeavour to qualify in various Engineering and Medical entrance exams in the country. We started Aakash Foundations in 2009 with the aim to nurture the aspirations of junior class students and train them for central and state board examinations, and for junior competitive scholarship tests and merit tests, such as the Olympiads and NTSE and build their foundation for various Medical and Engineering entrance exams.

Even today we aim at clearing doubts and strengthening fundamentals of students in their subjects, because we believe these cleared doubts and strengthened fundamentals will eventually strengthen the destiny of our nation, which actually lies in these hands that are holding the ‘mighty’ pen & learning techniques and with Aakash we believe that their future is in safe and progressive hands.

Olympiads
Olympiads provide a unique competitive platform to young intellectuals. They help students analyze their weak and strong attributes and bring out the best in them. Olympiads are highly challenging in nature which improves students’ aptitude and builds their confidence. In addition, they cultivate analytical thinking, improve conceptual understanding and enhance problem solving skills.

Each Olympiad is a separate exam with its own organizing body and a common set of rules and regulations. Olympiad exams thus serve as a platform to challenge the intellectual minds in mathematics and science across the world.

NTSE (National Talent Search Examination)
The National Talent Search Examination (NTSE) is a national level scholarship program in India started in the year 1963. The purpose of the scheme was to identify talented students and nurture their talents. ‘Talent’ refers to the potentiality that manifests itself at a high level of performance in one or more specialized areas. Therefore, it covers areas like science, social science, engineering, medicine, management and law. It is organized by – National Council of Educational Research and Training (NCERT) and it honors and helps talented students by providing financial assistance in the form of a monthly scholarship. For the courses in basic sciences, social sciences and commerce, this assistance would extend to Doctor of Philosophy (Ph.D.) level whereas for professional courses like engineering, medicine, management and law this assistance is given only up to post graduation. The scheme is open to students of Indian nationality studying in class X. It not only helps students to proliferate their mental level but also helps them to sharpen their minds.
